

36in. Hemispherical parachute folding Instructions.

Step 1: Lay chute out flat

Step 2: Fold in half.

Step 3: Fold into thirds

It should look like this.

Step 4: Fold the top down into thirds

Step 5: Roll up. Be careful not to tangle the shroud lines!

Step 6: Wrap the shroud lines around the chute. They should not be tight, just enough to keep the chute folded until it is deployed. Make sure that the lines are not tangled!

Step 7: Go and fly your rocket!
